 - Positives for PE
 - Labs / Imaging
 - Assessment and Plan
 - Differential Dx: acute appendicitis, perforated appendix, cecal diverticulitis, gastroenteritis, testicular torsion
 - o Perforated Diverticulum
 - HPI
 - Positives for ROS
 - Vitals
 - Positives for PE with explanations
 - Labs / Imaging
 - Assessment and Plan
 - Differential Dx: perforated diverticulitis, perforated peptic ulcer, paralytic ileus, incarcerated hernias
 - Relevant journal article on Hartman vs primary anastomosis (referencing for H&P #3)
- 5 H&P Pharm Cards all related to drugs seen in the surgical field

Feedback Received

- Feedback for Presentations
 - o Make sure to emphasize prior hospitalizations and surgeries, outcomes of admission, and medications providing stabilization!!!
 - o Do not always follow along with providers plan, can adjust to make your own
 - o Appropriate performance for Rotation 6
- Feedback for H&P write ups
 - o Excellent writing skills
 - Treatment plan was well written
 - o Good capture of information and good structure
 - o Nice explanation for differential diagnoses
 - o Include labs that need to be ordered even if the treatment team did not do it
 - o Address abnormal lab / imaging findings!!!!

Changes Planned

- Use my own clinical judgment instead of agreeing with provider at face value
- Review red flag symptoms
