

## Site Evaluation Presentation Summary – IM

### Presented

- 2 out of 3 Comprehensive H&Ps
  - o CC: Neck lump x 2 hours → Ectopic Thymoma
    - HPI
    - Positives for ROS
    - Vitals
    - Positives for PE with explanations
    - Labs / Imaging
    - Assessment and Plan
    - Differential Dx: **Ectopic thymoma** vs. lipoma vs. lymphadenitis vs. epidermoid cyst vs. cutaneous abscess
  - o CC: Right Shoulder Pain x 1 week → Rotator Cuff Tear
    - HPI
    - Positives for ROS
    - Vitals
    - Positives for PE with explanations
    - NIH Stroke Scale, Glasgow Coma Scale
    - Labs / Imaging
    - Assessment and Plan
    - Differential Dx: **Rotator cuff tear** vs. Subacromial impingement syndrome vs. Frozen shoulder vs. Bursitis vs. Fracture
- Relevant journal article on Corticosteroids vs Anesthetic Injections for Rotator Cuff Injuries (referencing for H&P #2)
- 5 H&P Pharm Cards all related to drugs commonly used in Family Medicine

### Feedback Received

- Feedback for Presentations
  - o Do not always follow along with providers plan, can adjust to make your own
  - o Overall good presentations
  - o Appropriate performance for Rotation 7
- Feedback for H&P write ups
  - o Excellent writing skills
    - Treatment plan was well written
  - o Good capture of information and good structure
  - o Nice explanation for differential diagnoses
  - o Work on expanding differentials just from HPI
  - o GO OVER IMAGING CRITERIA on American Radiology to help with work up plan

### Changes Planned

- Use my own vernacular when presenting to make it sound like someone from my level of training
- Use my own clinical judgment instead of agreeing with provider at face value
