

## Site Evaluation Presentation Summary – EM

### Presented

- 2 out of 3 Comprehensive H&Ps
  - CC: LLQ pain x 2 days → Left Tubo-Ovarian Abscess
    - HPI
    - Positives for ROS
    - Vitals
    - Positives for PE with explanations
    - Labs / Imaging
    - Assessment and Plan
    - Differential Dx: **Left TOA** vs. ovarian torsion vs. appendicitis vs. ectopic pregnancy vs. cystitis
  - CC: Testicular swelling x 2 days → Epididymitis
    - HPI
    - Positives for ROS
    - Vitals
    - Positives for PE with explanations
    - Labs / Imaging
    - Assessment and Plan
    - Differential Dx: **Severe epididymitis** vs. scrotal cellulitis vs. Fournier's gangrene vs. testicular torsion vs. strangulated inguinal hernia
  
- 5 H&P Pharm Cards all related to drugs commonly used in Emergency Medicine

### Feedback Received

- Feedback for Presentations
  - Do not always follow along with providers plan, can adjust to make your own
  - Overall good presentations
  - Appropriate performance for Rotation 8
- Feedback for H&P write ups
  - Excellent writing skills
    - Treatment plan was well written
  - Good capture of information and good structure
  - Nice explanation for differential diagnoses
  - Learn pain relief dosages
  - Work on expanding differentials just from HPI
  - GO OVER IMAGING CRITERIA on American Radiology to help with work up plan

### Changes Planned

- Use my own vernacular when presenting to make it sound like someone from my level of training
- Make sure labs reflect timing that the patient was seen, write pending instead of give lab results at the time the patient was out of your service
- Use my own clinical judgment instead of agreeing with provider at face value
