

Site Evaluation Presentation Summary – AM

Presented

- 1 out of 3 Comprehensive H&Ps
 - o CC: Abdominal pain x 8 hours → **Appendicitis**
 - HPI
 - Positives for ROS
 - Vitals
 - Positives for PE with explanations
 - Labs / Imaging
 - Assessment and Plan
 - Differential Dx: **Acute appendicitis** vs. perforated appendix vs. ovarian torsion vs. ectopic pregnancy vs. cecal diverticulitis vs. gastroenteritis vs. kidney stone
- 5 H&P Pharm Cards all related to drugs commonly used in Urgent

Feedback Received

- Feedback for Presentations
 - o Do not always follow along with providers plan, can adjust to make your own
 - o Overall good presentations
 - o Appropriate performance for Rotation 9
- Feedback for H&P write ups
 - o Excellent writing skills
 - Treatment plan was well written
 - o Good capture of information and good structure
 - o Nice explanation for differential diagnoses
 - o Work on expanding differentials just from HPI
 - o GO OVER IMAGING CRITERIA on American Radiology to help with work up plan → knowing indications for contrast in CT for diagnosing appendicitis (CTA w/o contrast is sufficient)

Changes Planned

- Use my own clinical judgment instead of agreeing with provider at face value
- Understand importance of disposition plans in urgent care setting
- Knowing when to use pain management if sending a patient to the ED
